

WM-D amplifiers are equipped with a class D power amplifier. The amplifier has 0dB and + 6dB inputs, 0dB output, gain control, treble and bass control, a limiter and a six-step level indicator. The amplifier has a Combo socket, which allows you to connect the signal using a cable with an XLR or Jack plug. The modern design of the WM-D amplifiers allows for cooperation with other amplifiers and mixers in order to increase the power of the entire sound system.

Technical data	WM - 400D	WM - 600D
Output power	400 W	600 W
Speaker outputs	2Ω (35V)	2Ω (35V)
XLR balanced input sensitivity (switchable)	0dB, +6dB	0dB, +6dB
XLR line output level (balanced, transformer)	0dB	0dB
Low-pass filter	40-120Hz	40-120Hz
Universal adjustable input with timbre: bass, soprano	bass: 100Hz; soprano: 10kHz ±12dB	bass: 100Hz; soprano: 10kHz ±12dB
Frequency response	20 - 20000 Hz	20 - 20000 Hz
Forced cooling (fan)	yes	yes
Limiter	yes	yes
Working temperature	from 5 to +40 ° C	from 5 to +40 ° C
Dimensions width/height/depth (mm)	443x44x250	443x44x250
Weight (kg)	8,5kg	9,4 kg
